Wilson de Oliveira Souza

Lendo pacotes necessários para lidar com o dados

```
library(data.table)
library(tidyverse)
library(lubridate)
library(hms)
library(here)
```

Definindo ambiente dos dados e lendo os dados

```
path <- here::here("data", "raw", "2021_06_fito.csv") # Para usar o arquivo exemplo upado no github, ut
data <- fread(path)

head(data, n = 10)
```

```
##              names      pred
